

SUPPORT THE FIGHT FOR WOMEN'S RIGHTS IN IRAN!

The Iranian people are living under a regime that for 30 years has been engaged in repression and terror against its own citizens.

The worst affected are the women. The oppression of women is inscribed in national law - women are declared incapacitated, worth only half of a man.

None of the candidates that participated in the Presidential elections stand for democracy and equality. None of them recognizes equal rights for women.

A new regime is needed; one that recognizes and respects equal rights for women. New laws are called for that protect human rights and guarantee equality, justice and democracy.

Women in Iran refuse to be silenced. They do not accept being made invisible and forgotten. Women are demonstrating, risking their lives for freedom and human rights.

The fight for all women's equal rights will go on!
